Millions of years: where did the idea come from?

Dr. Terry Mortenson

To really understand what is wrong with belief in millions of years, we need to go back to the early 19th century and study the origins of this idea. This lecture, based on Dr. Mortenson's PhD research, will show that the idea did not come from the rocks and fossils but rather from anti-Biblical worldviews (or philosophical assumptions) being imposed on the geological evidence. He also discusses some of the damage to the church that followed over the next 150 years as Christian leaders compromised with old-earth geology. This is very relevant to the moral and spiritual chaos occurring in America today.

Dr. Mortenson is one of the speakers from Answers in Genesis and has been an ICC presenter.

You will not want to miss this special presentation.
